Welcome again to the penultimate issue of MWN in the 55th Volume. Below you will find details of new 2010 membership rates. For those members receiving paper copies of MWN, if your membership is about to expire you will find a renewal form enclosed. We hope you will feel inclined to renew your membership and continue your participation in the Circle.

Membership Renewal Time

For historical reasons, many full membership subscriptions to the Circle run out at the end of March 2010 – if yours is one of them you will find an appropriate renewal form included with this issue of MWN. Please note that if you do not renew promptly, the next issue will be the last copy of MWN that will arrive through your letter box, and you will lose access to e-MWN and the e-news service at the end of March.

Benefits of Circle Membership

10 issues of printed MWN e-MWN instantly available on-line
MWN e-list service (Yahoo Group) Big discounts on WRTH

When you renew, please consider the benefits of taking out a 2 or 3 year membership. These simplify our administration, and they make print runs much more predictable so they help hold down subscription rates. You'll also benefit by avoiding any forthcoming increase in membership rate. If your membership has not yet run out, you can extend it at current rates before the end of February.

New fees from 1st April 2010:

	1 year to March 2011	2 years to March 2012	3 years to March 2013
UK	£13	£24	£35
Europe (inc Irish Republic)	€ 32	€ 59	€ 86
Rest of World – airmail	US\$44	US\$81	US\$119
Rest of World – surface	US\$34	US\$63	US\$92

The payment structure has been simplified this year, and subscriptions have increased slightly in sterling (£/GBP) terms. This, the first increase in 17 years, is intended to maintain the health of the reserves. During 2009 Circle expenditure exceeded income by approximately £800, due to a reduction in interest payable on our savings accounts, and to the ongoing decline in CD sales. The new rates also anticipate an increase in postage costs in April 2010. The subscription rates for overseas members have been adjusted for exchange rate movements over the last 12 months. To encourage payment by PayPal the surcharge has now been removed, since this method of payment simplifies our administration. Whilst every effort is being made to contain costs, a further increase in rates cannot be ruled out for 2011.

Subscription fees from 1 March 2010 are based on the methods of payment detailed below. The quickest way to renew your membership is on-line at <http://www.mwcircle.org/join.htm> using PayPal (or if you don't have a PayPal account, you may pay by credit card via PayPal):

UK members: PayPal (no surcharge), bank transfer, cheque, Postal Order, or cash (notes only, sent at your own risk – registered mail recommended). For payment by bank transfer you will need some or all of the following details (be sure to copy them exactly!):

Bank: Royal Bank of Scotland, Lochinver Branch Sort Code: 83-24-28

Name of Account: Medium Wave Circle Account Number: 00144522

Reference: Your MWC membership number (if available; may be obtained from the address label).

Overseas members: PayPal (no surcharge) or cash (notes only, sent at your own risk – registered mail recommended). Payment in other currencies may be made at the prevailing exchange rate. If you would like to use another form of payment, please e-mail the Treasurer (treasurer@mwcircle.org) for the subscription rate using your preferred method. Rates will include any transaction charges in addition to the basic membership fee.

BBC releases new archive material on Lord Haw Haw

Andy Sennitt informs us, “The BBC has released a collection of archive material about Lord Haw Haw’s wartime broadcasts from Nazi Germany. I am pleased to report that this material is available worldwide, unlike some other archive material which is restricted to the UK. The collection contains a 37-minute feature first broadcast in 1940 called “The Ear of Britain” about the BBC Monitoring Service, where I worked for four years in the 1970s, as well as lots of recordings of Lord Haw Haw’s broadcasts. That includes his final broadcast when, speaking slowly and with slurred speech, he had clearly consumed a lot of alcohol!

Browse the collection <http://www.bbc.co.uk/archive/hawhaw/index.shtml>

Propagation webinar

Nick Hall-Patch writes with some interesting propagation information:

<http://www.pvrc.org/webinar/2010-01-20%202022.01%20160%20Meter%20Propagation.wmv> has a recorded "webinar" concerning propagation on 160 metres by Carl Leutzelschwab, K9LA. It's about an hour and a half long, and is quite intriguing.

One point that came up is that the north magnetic pole is moving northwards, and the movement has accelerated in the last decades:

<http://news.nationalgeographic.com/news/2009/12/091224-north-pole-magnetic-russia-earth-core.html> has a bit more on this topic. The upshot is that we may receive TA's in North America more regularly in future years, because the auroral zone tracks the magnetic pole, and the southern edge of the zone is moving north with the pole.

The other point addresses a possible explanation for the surge in long distance receptions just as the K-index increases at the onset of a geomagnetic storm, as apparently the duct between the E and F layers becomes better defined at this time, and the duct allows transfer of long range signals with little loss compared with ground bounces.

<http://mysite.verizon.net/k9la/> has a number of articles about propagation, and 160m propagation in particular, and should soon contain the Powerpoint presentation on which the webinar was based.

Now on with the show. Welcome to 2010!

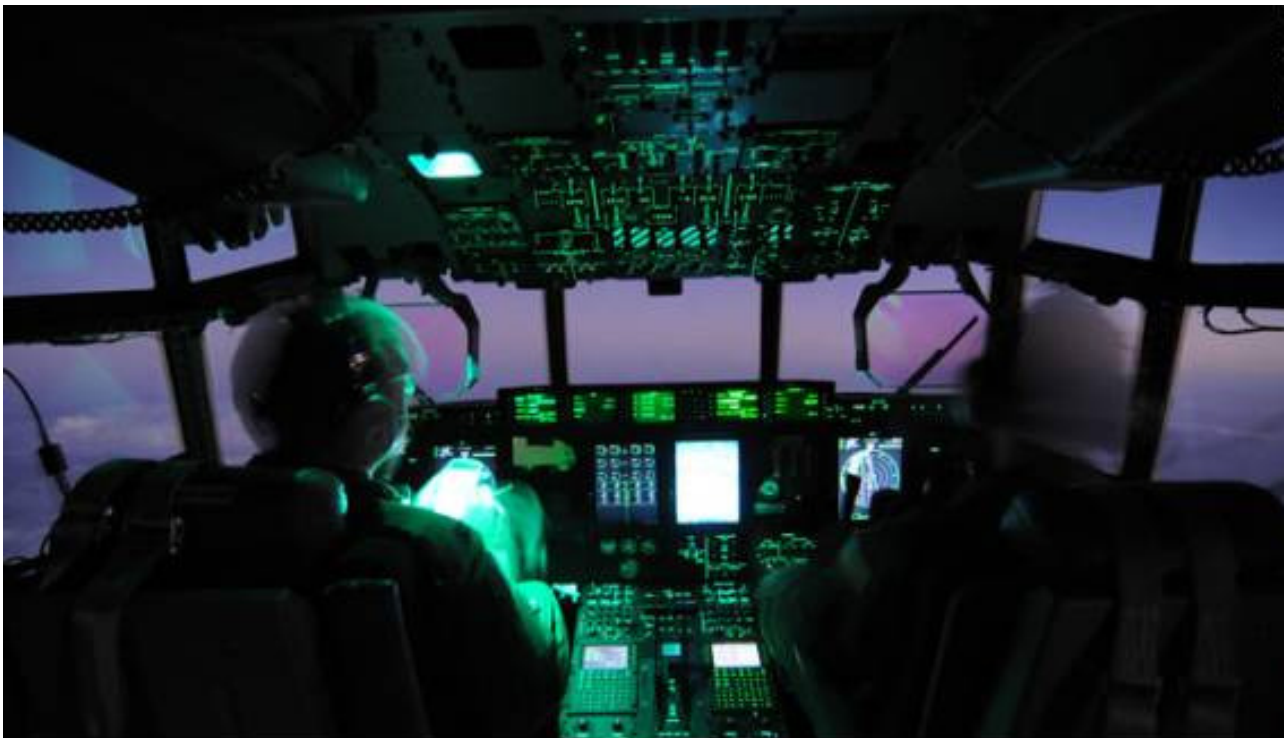

73s Steve

COMMAND SOLO TALKING TO HAITI

via CNN

Sixty miles west of Port-au-Prince, Haiti, an Air Force C-130 makes slow and lazy ovals over the Golfe de la Gonzave, a 264-foot weighted wire dangling from its belly like a plumb line.

This is Commando Solo, a radio station in the sky. The long wire, kept vertical by a 500-pound lead weight, is helping transmit an AM radio signal to the people of Haiti. Four other antenna on the wings and fuselage are sending FM signals.

The U.S. government is using Commando Solo to deliver news and information to the survivors of the January 12 earthquake. During much of the day, the plane relays live broadcasts of Voice of America news call-in shows in Creole, the native tongue of Haiti.

During lulls in the VOA programming, it sends pre-recorded public service announcements, including advice on sanitation, what to do when encountering a dead body, and a warning from the Haitian government not to attempt dangerous and illegal ocean crossings to Florida in small boats.

None of the 10-member crew aboard Commander Solo speaks Creole. But the technician who monitors the broadcast says he nonetheless can get a sense of the impact of the quake. "You can hear in people's voices a lot of emotion, sometimes a little bit of frustration, sometimes really anxiety," said Brian. (The Air Force asked CNN to identify crew members only by first name and rank.)

"We hear a lot of people calling in trying to check in with their relatives and find out where they're at. And so it's pretty interesting just to hear it, even though I don't understand the language, the message really does come through," he said.

Commando Solo, part of the Pennsylvania Air National Guard, has engaged in special operations in Afghanistan, Iraq and other trouble spots around the world. The Haiti mission is a rare mission focused on humanitarian relief.

"I feel it's a very important mission. I feel very proud that we're a part of it," said Brian. The plane's pilot, David, echoes the sentiment. "I'm honored to be here. I mean anything we can do to actually help these people, I'm glad to do."

To insure that their message is being received, the Department of Defense has handed out tens of thousands of portable radios in Haiti. The radios are both solar and hand-crank operated, and don't need batteries.

C-130J's of the 193rd Special Operations Wing prepare depart Middletown, Pennsylvania Jan. 15, 2010. →

Kathy, a first lieutenant and the mission control chief on the flight, says the plane is an effective way to communicate with the public in disasters. "Anyone can turn on a radio, tune it up," she said. "We're able to reach all of Haiti right now with our message."

One of those messages is a dire warning from Raymond Joseph, Haiti's ambassador to the United States.

"Listen, don't rush on boats to leave the country," Joseph says in Creole. "If you do that, we'll all have even worse problems. Because I'll be honest with you: If you think you will reach the U.S. and all the doors will be wide open to you, that's not at all the case.

"And they will intercept you right on the water and send you back home where you came from."

U.S. Coast Guard spokesman Lt. Cmdr. Christopher O'Neil said there is no evidence of people fleeing Haiti for Florida, and officials do not expect a mass migration. Previous mass migrations were caused by geopolitical turmoil, not by natural disasters, O'Neil said.

In addition, there is a large U.S. government presence on the ground in Haiti, on the water, and in the air -- which is likely to deter migrants, authorities say.

Altogether, the Pennsylvania guard unit has three Commando Solo planes, two of which are deployed to the Haiti mission.

During the first week of operation, missions lasted about eight hours, but the flights have since been lengthened to 14 hours, allowing 10 hours a day of broadcast time. The flights are so long it requires aerial refueling of the plane.

- Commando Solo broadcasts guidance, in Creole, for about 10 hours a day over Haiti
- U.S. Air Force plane trails a vertical wire, with a 500-pound weight, to act as its AM antenna
- Broadcasts include Voice of America programming and announcements from Haitian officials
- The entire broadcast is in Creole, the most common language in Haiti

The airplane flew an estimated 3,200 miles on Saturday, most of it in a loop above Haitian waters.

Commando Solo crew members say they are uncertain how long they will continue operations in Haiti. Several commercial radio stations damaged by the quake have resumed operations.

But they say their efforts are worthwhile.

"When people think of the military they think about going out, blowing things up, destroying," said Barry. "We're at the other end of it. We are there to assist people, to help people, to save people."

MONTREAL AMs GO DARK

Two of Canada's biggest AM signals were abruptly silenced Friday (29th January) afternoon in yet another sign of the continued slide into oblivion for the senior broadcast band north of the border.

At 7:00 Friday night, Corus turned off the 50,000-watt transmitters at Montreal's CINF (Info 690) and CINW (AM 940), saying in a statement that the stations were no longer able to support themselves.

"We put tremendous effort into trying to find the right format and content to grow our audience base and operate profitably, but after years of effort it is clear these AM stations are not viable," said Corus Québec vice president Mario Cecchini.

It's been just over a decade since CBC/Radio-Canada abandoned its use of the AM dial in Montreal, freeing up those big 50 kW allocations for new applicants. What was then Metromedia-CMR applied to move two of its smaller signals - French-language CKVL (850) and English-language CIQC (600) - to those class A clear channels.

At the time, it seemed like a good move, giving both stations full-market coverage to compete with what were then several other strong AM outlets in the market, and Metromedia made a big splash with its launch of two new all-news formats, "Info 690" in French and "940 News" in English. Those ambitious ventures soon ran into static: on the English side, the move of CBC's CBM to FM took much of the Anglophone audience away from AM for good, leaving only the venerable CJAD

(800), which continued to own the lion's share of what AM listening remained. After segueing from all-news to talk, CINW threw in the towel in 2008, going oldies (mostly automated) as "AM 940, Montreal's Greatest

Hits."

At 10 a.m., January 29, 2010 an audio loop of Yves Bombardier, General Manager of CINF, CHMP and CKAC, informed listeners that CINF was closing down permanently, and inviting listeners to tune in to CHMP. CINW would air a similar audio loop for their own listeners.

At 7 p.m. both stations went dark entirely

CINF, meanwhile, also struggled to find an audience, and its fate was probably sealed when a change in regulations allowed Corus to launch a spoken-word format on FM (CHMP 98.5). The 2004 launch of "FM 98,5" drew most of the remaining Montreal Francophone AM audience over to FM, weakening not only CINF but also sister station CKAC (730), which found a small niche as a French-language all-sports station.

By late 2009, CINF had significantly cut back its programming, turning over late-night hours to Corus' regional "Souvenirs Garantis" oldies network, and in the most recent BBM ratings, "Info 690" drew just a 1.2 share

of the Francophone audience, with barely 100,000 listeners a day tuning in. (CINW drew a more respectable 2.6 share of the smaller Anglo audience, while CKAC pulled a 5.7.)

The end of CINF and CINW means the loss of only a handful of jobs, since most of the stations' staff was shared with other Corus stations. Three of CINF's eight news staffers will lose their jobs, while the other five stay on to provide news to CHMP and Corus' province-wide network.. CINW had just one on-air host and one producer remaining, and they're out of work as well.

With Corus returning the 690 and 940 licenses to the CRTC, it's not clear whether the frequencies will ever light up again in Quebec. While there's still demand for AM signals in Montreal from ethnic broadcasters, the CRTC has been reluctant to put those stations on signals that may be too big to be economically sustainable for small broadcasters. (The 600 and 850 frequencies that were abandoned in 1999 in favor of 940 and 690 have never been reused.)

Whatever happens, those frequencies won't become available for bigger signals south of the border; they're reserved for Canadian use by international treaty, and Canada continues to "notify" its dead AMs for international purposes.

If CINW, in particular, is truly dead, it marks the end of a lineage that can be traced back to Canada's first radio station: AM 940 was the continuation of the license that began in 1919 as Canadian Marconi's XWA, then became CFCF ("Canada's First, Canada's Finest") for seven decades. It's a sad end to a long history - and a sign that the days of AM radio in Canada are rapidly winding down.

Three burglars in Kentucky picked the wrong radio station to rob

Published on Friday, January 15, 2010

Police in Corbin, KY nabbed three people attempting to steal equipment from WKDP-AM (1330).

Responding to a call from a witness that a shed at the station was being broken into, police found three people in a car near the shed. The car was loaded with electronic equipment belonging to the talk station.

When questioned by police at the scene, the two men and one woman said they were asked to take the equipment, but that claim became moot when station owner Derek Eubanks, who just happens to be the chief deputy of the county police department, arrived on the scene. The Times Tribune newspaper reports the three were charged with third-degree burglary, and when searched, one of the burglars was carrying a baggie of pills and was charged with possession of a controlled substance.

Supercharging the Tecsun PL-380 DSP Portable

A 7.5" Loopstick Transplant Optimized for Medium Wave

By Gary DeBock, Puyallup, WA USA December 2009

Introduction The Tecsun PL-380 AM-LW-FM-SW receiver represents the best effort of China's premier radio manufacturing company to incorporate all the innovative features of Silicon Labs' 4734 DSP chip.

As the refined product of several months of manufacturing improvements, the model offers astonishingly effective 1 kHz DSP-enhanced selectivity (as well as 2, 3, 4 and 6 kHz filtering options for other listening situations), plus freedom from the "soft mute" issue that plagued all previous 4734 DSP chip radios (PL-300WT/ G8, D92L, D96L and PL-310). With the razor-sharp AM selectivity offered by the PL-380, serious transoceanic DXing is certainly possible for purchasers of this inexpensive pocket radio (\$45.99 plus \$24 shipping by registered air mail from Hong Kong), especially when it is coupled to effective external antennas..

The PL-380 Stock Loopstick Although the DSP-enhanced AM selectivity of the PL-380 is impressive indeed, the loopstick of this breakthrough model certainly won't thrill dedicated DXers. Tecsun has chosen to include a relatively small and flat (3 1/8 x 5/16", or 80 x 8mm) ferrite bar with a strange three-section coil, a combination proven to have slightly lower AM sensitivity than that of the PL-310 model. Even though the stock PL-380 is still capable of receiving some interesting AM band DX with reasonable sensitivity, dedicated transoceanic DXers really need optimum weak-signal reception from the loopstick, and this model's cost-cutting midget bar was simply unacceptable to the TP-chasing author.

A decision was made to transplant an effective 7.5" Amidon Type 61 ferrite bar-based loopstick into the PL-380, with the 40/44 Litz wire coil inductance perfectly matched to the 4734 DSP chip for optimum AM sensitivity. This would complement the PL-380's razor-sharp selectivity with

an equally effective weak-signal DXing capability, presumably transforming the model into a compact AM-DXing sensation.

Transplant Materials Required To perform this modification, a hobbyist will need to order one 7.5" Amidon Type 61 ferrite bar (available from <http://www.amidoncorp.com> , part #R61-050-750, \$20.00 plus shipping) and approximately 15 feet of 40/44 Litz wire (available from Dave Schmarder, who prefers to quote a price after an inquiry by email to thefiercerabbit@1n34a.com). In addition to these loopstick materials, a hobbyist will need to choose a mounting system for the new external loopstick, either a plastic frame glued to the upper front cabinet section (used by the author), or a plywood type mounting frame holding both the radio and loopstick (used by John Bryant and others). Both of these mounting systems are described in the E100 Slider Loopstick article, posted at <http://www.mediafire.com/?nqggfm2jymc> . Standard electronic tools will be used for the procedure.

Loopstick Transplant Theory Detailed experiments on previous Tecsun 4734 DSP chip models (PL-300WT, G8, etc) have shown that the DSP chip provides optimum AM sensitivity when the loopstick coil inductance is properly matched to 4734 chip's internal varactor. Unlike previous radio models, these DSP radios can provide maximum AM sensitivity across the band with a single optimum inductance value from the loopstick coil.

This modification not only will provide a great increase in the size and quality of the ferrite bar used in the PL-380 loopstick, but it will also use a 40/44 Litz wire coil found to have the optimal inductance match (with the 4734 DSP chip varactor) for maximum AM sensitivity. In detailed testing with an 81-turn Slider coil and this 7.5" Amidon ferrite bar (shown in the picture to the left), AM signal strength readings were checked on the PL-380's digital display for different coil positions (and different inductances) as the coil was slid across the ferrite bar.

The purpose of this testing was to find the optimal loopstick coil inductance for maximum AM sensitivity in the PL-380 with a loopstick of these parameters. Since the signal strength readings on the PL-380 digital display change from sample to sample, it was necessary to average the readings in each coil position, and search for a point where the average signal readings were clearly much higher than other coil positions across the ferrite bar.

After detailed testing, such a coil position was actually found at the 554 μ h (microhenry) coil position, where the 81-turn Slider coil was 43 mm (1 11/16") from the end of the ferrite bar. As shown in the photo, this position clearly provided a huge increase in AM signal strength readings relative to the stock PL-380, averaging about 20 dB μ across the band. Although this

554 μ h inductance was found to be optimal for a loopstick constructed of a 40/44 Litz wire coil on a 7.5" type 61 ferrite bar in the PL-380 model, recent testing indicates that the changing any of the experimental parameters (ferrite bar size or length, ferrite mix, Litz wire type, coil "Q" or DSP radio model) may result in a different optimal inductance value..

Constructing the New Loopstick The new coil of 81 turns of 40/44 Litz wire should be wound on a base of adhesive tape (Johnson & Johnson 2" waterproof tape is recommended by the author) around the Amidon ferrite bar, with the sticky side facing up (to hold the coil turns in place). Place about 3" of this adhesive tape on the ferrite bar, with the beginning edge about 1" from the end of the bar. Leaving about 10" of extra Litz wire to be used for connection leads at each end of the coil, start winding the 81-turn coil of 40/44 Litz wire on the adhesive tape, starting at a position exactly 43 mm (1 11/16") from one end of the ferrite bar, and working toward the center of the bar.

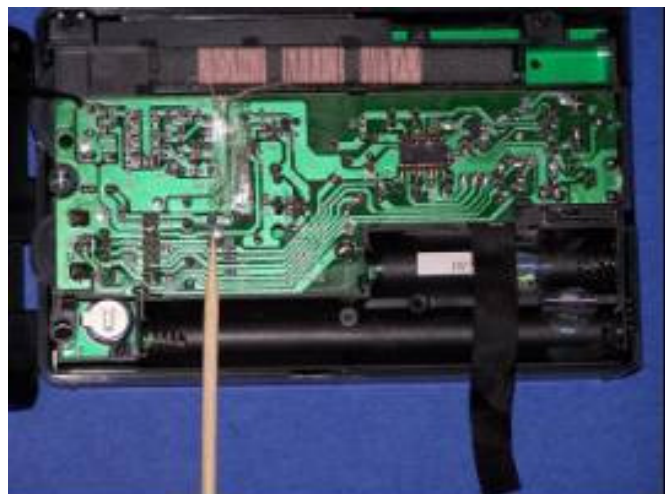

When you are finished winding this 81-turn coil, the length of the coil should be approximately 43 mm (1 11/16") long. Secure the coil with thin cut strips of strapping tape (insulating type only—Scotch "Extreme" brand strapping tape is recommended by the author) running horizontally across the coil. Although it is not necessary to use an LCR meter to perform this modification, the coil's inductance may be checked at around 554 uH, if desired. Minor variations in coil inductance will not cause any significant degradation in the new loopstick's DXing performance.

Preparing for Installation The PL-380 stock loopstick and the wrist strap should be removed from the radio prior to installation of the new loopstick. Although the wrist strap is easy to remove, the stock loopstick typically will not depart without testing the patience of the hobbyist.

Remove the four screws from the back of the cabinet (as shown in the photo at left), one of which is a shorter screw in the battery compartment. Carefully separate the front and back cabinet sections, taking care not to pull on the whip antenna connector wire. Lay the circuit board in a flat position, and note the two loopstick antenna leads soldered to the circuit board (shown in the photo below).

Pull the small strip of strapping tape off of these two antenna leads, and desolder the leads from the circuit board. Using a small flat-bladed jeweler's screwdriver, break the glue bonds on all four sides between the loopstick ferrite bar and the plastic mounting slot, and separate the plastic notch pins from both sides of the ferrite bar. Continue working patiently until the ferrite bar will rotate inside the slot, then attempt to pry the ferrite bar out of the cabinet by sliding the jeweler's screwdriver alternatively under each end of the ferrite bar.

Since the loopstick is secured with an excessive glob of glue on the bottom side

(where the coils meet the plastic slot), it is unlikely to salvage the loopstick intact in one piece, but for purposes of the transplant modification, the empty plastic slot will provide a convenient routing space for the new 40/44 Litz wires, without the stray inductance that would occur if the stock loopstick were left in the cabinet.

After the stock loopstick is removed from the cabinet, remove the wrist strap also (the new Litz wires will be routed through the wrist strap hole in the back cabinet section). At this time, the newly wound 7.5" loopstick should be secured to the mounting system of the hobbyist's choice (either the plastic frame attached to the front top cabinet surface, or a plywood frame holding both the loopstick and the PL-380 cabinet). Route the two 40/44 Litz wire leads through a shrink tubing length if desired (as shown in the photo at left), and direct them into the empty slot left by the removal of the stock loopstick (as shown in the photo).

After ensuring that the new Litz wire leads are routed without stress and that the leads will not short adjacent circuitry, solder the two leads to the circuit board connections previously used by the stock loopstick.

Place a small strip of strapping tape (insulating type only) across these newly soldered leads, and carefully mate the front and back cabinet sections together, routing the Litz wires through the empty hole left by removal of the wrist strap. Reinstall the four cabinet screws and the three AA batteries, and check for normal operation.

A New World of AM and LW Sensitivity The installation of this 7.5” loopstick transplant provides an astonishing increase in the PL-380’s weak signal sensitivity on both the medium wave and long wave frequencies, making the model competitive for all types of DXing.

On the AM band, the signal boost over the stock unit typically will be around 20 dBμ on all frequencies, as shown in the test photo above. During daytime DX testing at local noon, the modified PL-380 was able to receive 15 fringe AM stations completely inaudible on the stock unit, many of which were outside of the author’s home state of Washington.

The following table details the RSSI readings (in dBμ) and S/N readings (in dB) received on both units while receiving various fringe stations here in Puyallup, WA during these daytime DX conditions.

	Stock PL-380	External Loopstick PL-380
530-TIS	18 dBμ, 12 dB	40 dBμ, 18 dB
610-KONA	17 dBμ, 00 dB (no reception)	30 dBμ, 03 dB (fair reception)
750-KXL	29 dBμ, 00 dB (weak reception)	42 dBμ, 00 dB (moderate reception)
1110-KWDB	30 dBμ, 00 dB (trace)	37 dBμ, 21 dB (moderate reception)
1390-KJOX	34 dBμ, 00 dB (no reception)	49 dBμ, 00 dB (weak reception)
1510-KGA	29 dBμ, 00 dB (no reception)	43 dBμ, 00 dB (weak reception)
1600-KVRI/KOHI	17 dBμ, 00 dB (no reception)	35 dBμ, 00 dB (weak reception)
1640-KDZR	19 dBμ, 00 dB (no reception)	39 dBμ, 00 dB (weak reception)

To the author’s surprise, the overall AM performance of this fixed-coil loopstick was found to be slightly superior to that of the E100 Slider models, even after the Slider coils were peaked. This provides an obvious advantage of allowing a DXer to chase transoceanic DX during brief band openings, without the need to peak a coil each time a new frequency is selected.

A similar huge boost in LW sensitivity was observed on the modified PL-380, with the transplant unit receiving five beacons (at local noon) completely inaudible on the stock unit: 329-LAC, 344-XX, 348-MNC, 353-RNT, and 361-BF. Although this 7.5” loopstick transplant was designed to optimize AM sensitivity, because the final loopstick coil inductance value of 554 μh is far closer to the optimal LW inductance than the stock 233 μh value, this AM-oriented loopstick upgrade provides the additional bonus of greatly improved LW sensitivity.

Summary As modified, this new PL-380 DSP model has the breakthrough AM sensitivity needed to complement its razor-sharp selectivity, providing a very competitive DXing package (in a very small size). For DXpeditioners and traveling DXers, it is a thrilling example of the recent DSP advances in Ultralight radios, and an exciting way to enjoy exotic DXing throughout the new year!

73 and Best Wishes,

Gary DeBock

NORTH AMERICAN NEWS

✉ Sand Gap, Bursea, Holme-on-Spalding Moor York YO43 4DF

with Andrew Brade

e-mail: na-news@mwcircle.org

Hello again.

Here is what's been happening on the North American AM dial. May I express my gratitude to the organisations which make this resume possible? Thanks this month to: - IRCA, ABDX, NRC DX News, FCC, CRTC, NERW.

1150 WGGH Marion, IL – A DX test is scheduled for 6th February – see below.

1560 KCAA Sioux Falls, SD – increases its night time power from 5kW to 10kW

1640 WTNI Biloxi, MS – format change to ESPN sports and now // with 1490 WXBD

1700 KB5XSZ Apache Junction AZ – as reported last month, the FCC have issued a special temporary authority for daytime only testing – more details are provided below

We start this month with some news items:

DX test

WGGH 1150 IL MARION. Date: Sunday morning (late Saturday night) February, 6, 2010. Time: 0000-0200 ELT (0500-0700 UTC). Mode of Operation: 5000 watts (daytime pattern). Programming: Classic Country, oldies music and various sound effects. LATE NEWS 30.1.10 - it is reported that this test is CANCELLED (per dxtests.info via SW).

New York City AM radio news

CBS President of Sales Michael Weiss tells Crain's New York that the previous year, "it was doom and gloom. Now automotive is back, banks are back...the environment is getting better." Having the World Champion Yankees didn't hurt, either. All that propelled all-news WCBS (880) into the #1 spot in New York, for the first time. That's based on yearly Miller Kaplan revenue estimates, which rank all-news "1010 WINS" in second place again. Third for 2009 was Clear Channel's top 40 "Z100" WHTZ, followed by CC's AC "Lite 106.7" WLTW and CBS Radio's all-sports "Fan" WFAN (660). The year ended strongly: Miller Kaplan says December in the New York market ended up 4.3% compared to the year before.

It is reported that certain Radio Disney stations may have closed down including 1650 WHKT. More when known.

LORAN-C radio navigation transmissions are due to closedown permanently on 8th February (see <http://www.navcen.uscg.gov/Loran/default.htm>)

Here is a general round up of what's been happening on the North American AM dial courtesy of our friends at the [International Radio Club of America and NRC](#).

CANADIAN RADIO NEWS

From Dan Sys via IRCA

690 CINF Montreal, QC Reported silent 30.1.10 due to Corus
Entertainment surrendering their licence.
940 CINW Montreal, QC Reported silent 30.1.10 due to Corus
Entertainment surrendering their licence.

NEW STATIONS ON THE AIR

1670 CJEU Gatineau, QC Following a decision made as long ago as 19th
March 2007, CJEU finally began transmissions
on 10.12.09 with "Radio Enfant" children-

PROPOSED NEW STATIONS

1350 NEW Gatineau QC 1,000 watts (days)/180 watts (nights)
(Christian) (French) (will simulcast CIRA 91.3
Montreal)

AM FREQUENCY CHANGES

1610 CJWI Montréal, QC CP granted for a frequency change to 1410 (the
old CFMB-1280 frequency) with U3 10000/10000
has been approved by the CRTC. CJWI stated it
is suffering interference from CHHA 1610
Toronto.

FORMAT CHANGES

1410 CKSL London ON Now Oldies 1410, was Nostalgia.

OFF THE AIR

850 CKBA Athabasca, AB Simulcast time for FM conversion expires

PROPOSED AM TO FM CONVERSIONS

1460 CJOY Guelph, ON Permission to move to FM DENIED by CRTC as it
would result in the owner, Corus, owing more
than the maximum two FM stations allowed in
this small market. The Commission denies an
application by 591989 B.C. Ltd. to convert
CJOY Guelph from the AM to the FM band.
Approval of the application would require an
exception to the common ownership policy, and
the Commission does not consider that an
exception is warranted in this case.

GRANTED AM TO FM CONVERSIONS

1270 CFGT Alma, QC Granted move to 104.5 MHz.
1340 CKCR Revelstoke, BC FM station on 106.1 is now on the air, meaning
the 1340 facility has less than 90 days of
life.

FACILITY AND PARAMETER APPLICATIONS / GRANTS

IRCA have combined the facility and parameter applications and grants into one section; note key legend below:

(A) = application, (G) = grant

560	WNSR	Brentwood, TN	Licensed for U5 4500/75 from two antenna sites, WNSR filed for a Special Temporary Authorization (STA) to operate U1 1125/75 from their current night site (a long wire) as they have lost the lease at their daytime site. (A)
590	WREN	Carrollton, IL	Extension of "silent" STA (A)
600	WREC	Memphis, TN	5000/5000 DA-N to 5000/5000 DA-2 (A)
680	WAPA	San Juan, PR	Correct Day co-ordinates to 18-24-16/65-56-52. Add night co-ordinates 18-24-17/65-56-50 and make minor changes to the night pattern. (A)
910	WUBR	Baton Rouge, LA	1200/1000 DA-D to 1200 DA-D (A)
920	WGNU	Granite City, IL	450/500 DA-2 to 2000/600 DA-2 (A)
1060	WILB	Canton, OH	Licensed for D3 5000/0, WILB has a CP and is now running 15kW days. This amendment requests D4 15000/0 CH 15000, and there is also an application to relax some of the nulls in the Daytime directional array (A)
1060	WBIX	Natick, MA	U4 50000/2500, increasing the daytime power. Now using all five of their towers (formerly two of the five), the new daytime pattern directs all of the signal in a balloon-shaped plot due east as opposed to the old pattern which was directed to the northeast. (G)
1090	KULF	Bellville, TX	Licensed for D1 250/0, KULF had applied for D4 10000/0 CH 10000. The CH portion of the application has been deleted and new xmtr site at 29-56-05/96-06-47 (A)
1110	KDIS	Pasadena, CA	Licensed for U4 50000/12500, KDIS engineers discovered that the antenna system, which is built on ground that is landfill and as a result there has been settling, has caused the transmission and sample lines to deteriorate. KDIS has been issued an STA for U1 12500/5000 while new transmission lines are connected and necessary modifications are made to the phasor and tuning units. (G)
1140	KLTK	Centerton, AR	D1 5000/0. (G)
1150	WTMP	Egypt Lake, FL	Increase to 14K/700 DA-2 (A)
1160	WCXI	Fenton, MI	Licensed for U3 1000/1000, WCXI has had an application on file since 2004 for U4 15000/1000 moving to Wixom. This amendment requests U7 15000/1000 CH 15000 back at Fenton. The new site is co-located with the CP for WPON Walled Lake, MI. (A)
1170	WRPM	Poplarville, MS	Licensed for D1 10000/0 CH 1000 on 1530, WRPM was issued a CP for D1 5000/0 here. But now, They have amended the application to D1 1000/0 on 1170 kHz. (A)
1200	WAMB	Nashville, TX	50000 ND to 48000/110 DAN (A)
1210	new	Bixby, OK	7.5/7.2/250 DA-2 This change to a current application adds the critical hours at 7.2 kW to avoid interference to Philadelphia. (A)
1210	WQLS	Ozark, AL	10000/4 ND-D to 10000/3 ND (G)
1250	KBSZ	Wickenburg, AZ	350/100 ND to 800/50 ND (A)
1250	WKDL	Warrenton, VA	Licensed for U4 5000/32, WKDL has a CP for U4 8000/125. They later amended the application to U4 7800/125, and now have requested U4 7900/125. [corrected data from last issue] (A)
1260	WISO	Ponce, PR	2500/2500 ND to 2500/2000 ND (G)
1260	KBSZ	Apache Junction, AZ	U1 800/50, moving from Wickenburg on 1250. (G)
1270	WNLS	Tallahassee, FL	5000/5000 DA-N to 5000 ND (A)

1270	WRLZ	Eatonville, FL	Applies to decrease their day power to 5 kW and do away with the associated daytime directional pattern.
1280	KZNS	Salt Lake City, UT	50000/670 DA-2 to 50000/730 DA2 (A)
1300	KSET	Lumberton, TX	1500/320 DA-2 to 2000/270 DA-2 (G)
1310	WPLV	West Point, GA	add 25 watts night becoming U1 1000/25 (A)
1320	WLOH	Lancaster, OH	Applies to add 15 feet to their folded unipole antenna to accommodate an antenna for FM translator station W284BD.
1390	WADA	Shelby, NC	U1 1400/16, moving the transmitter site about three miles to that of the WZGV-730 323' tower and changing the Domestic Class from B to D. Note: WZGV is currently silent.
1400	KFJL	Central Point,OR	Having a CP for U1 1000/1000, this unbuilt station has, on three occasions, submitted changes to their transmitter site. This request makes four! (A)
1430	WHAN	Ashland, VA	1000/31 ND to 23000 ND (A)
1460	KCLE	Burleson, TX	5000/700 DA-2 to 12000/700 DA-2 (A)
1460	KBSF	Springhill, LA	Reinstated application for U1 5000/160 moving to Nash, Texas (near Texarkana), a move of about 60 miles. (A)
1470	KNFL	Tremonton, UT	Extension of "silent" STA (G)
1490	new	Lemont, PA	U1 1000/270 (A)
1490	KBZY	Salem, OR	Licensed for U1 1000/1000, after being 'evicted' from its original transmitter site, KBZY was issued a CP to move to a transmitter site of, and diplex into, KPJC-1220's tower and continuing with U1 1000/1000. However, that landowner backed out of the lease agreement and both stations have been operating under Special Temporary Authorizations (STA) since June 2006. Now, KBZY has applied to build a Kinstar antenna and continue with U1 1000/1000. (A)
1490	WOSH	Oshkosh, WI	1000/1000 ND to 1000/1000 (G)
1490	WTJV	Deland, FL	Currently silent due to their tower being destroyed, WTJV has applied to erect an 85' Valcom antenna system at the site of the original tower, and resume operation as U1 1000/1000. Station lost their tower last year when someone hit a guy wire with their car. New Zoning and code rules will not allow a taller tower. (A)
1510	KPIG	Piedmont, CA	Licensed for U4 8000/230, KPIG has a CP for U4 8000/2400. They have filed for an STA to operate U5 8000/58 while complete construction of the new nighttime facility which was scheduled to start on January 19, 2010. (A)
1520	new	Howard, WI	Application for a new station cancelled.
1530	WRPM	Poplarville, MS	5000 D to 1 KW day due to damage from Katrina. Station already has a STA for this power level. They want to make it permanent. (G)
1540	KMPC	Los Angeles, CA	CP for U4 50000/44000 dismissed. KMPC remains U4 50000/37000.
1560	KKAA	Aberdeen, SD	change from 10k/5k DA-2 to 10k/10k DA-2 (G)
1570	WTLK	Taylorville, NC	Decrease power to 900 day/198 night NDA (A)
1590	KEAS	Eastland, TX	500 ND-D to 1000 ND-D (A)
1600	KAHZ	Pomona, CA	Licensed for U2 5000/5000, KAHZ applied for U4 10000/20000. After discovering a fault in the buried cable to the tower enabling the night directional pattern, KAHZ is now operating under an STA of U1 5000/1250 until the transmission line can be repaired and retuning of the night signal is completed. (G)
1700	KBSZ	Apache Junction, AZ	STA for 1 KW on 1700 DAYTIME ONLY KBSZ will install a temporary 100' tower and test with 1 KW for conductivity measurements. The permit will be valid for 90 days and they expect

measurements will take about 7 days total. The authority expires on 16th March 2010. "Programming" will be an unmodulated carrier with hourly station IDs using the call sign KB5XSZ.(G)

CONSTRUCTION PERMITS ON THE AIR

- 1210 KTBK Auburn-
Federal Way, WA Licensed for U4 27500/10000 from two transmitter sites, KTBK has been granted an auxiliary license of U4 27500/227 and is now operating with those facilities. The application explains (repeated from the application announcement in AMS Volume 77 Issue 1): "The licensed nighttime transmitter site is located on the banks of the Green River, east of Auburn. For the past 47 years, this area of King County has been protected from flooding by the Howard Hansen Dam. The Army Corps of Engineers has discovered a leak in the dam and has announced that until repairs can be made the capacity of the dam to contain runoff will be limited. Flooding in the valley below, where the KTBK nighttime transmitter site is located is likely to occur. Repairs to the dam are projected to take as long as five years to complete. [The owner] is requesting authority to operate the presently authorized daytime facilities (with reduced power) during nighttime hours should the licensed nighttime transmitter site flood."
- 1560 KKAA Sioux Falls, SD Now on with U4 10000/10000 doubling their nighttime power. No change in the night pattern, except size, as it shoots up over the Minnesota/North/South Dakota borders into Manitoba.
- 1570 WTLK Taylorsville, NC U1 900/198 is on the air, after moving the transmitter to the site of co-owned WACB-860. Since the WACB tower is approximately 1.5 times the height of their old tower, WTLK was forced to reduce their power levels from U1 1000/244 in order to achieve the same coverage.

LICENCE CANCELLATIONS

- 1240 KMCL Donnelly, ID Calls deleted.

PUBLIC LISTINGS COURTESY OF THERADIOJOURNAL.COM AND 10000WATTS.COM:

- 1160 KVCE Highland Pk/Dallas, TX flips from business talk "The Voice" (now heard on KFCD 990 Farmersville TX) to "Radio Salaam Namaste" Indian programming, also heard on KFJZ 870 Fort Worth TX.
- 1170 WACV Montgomery, AL flips to oldies as "Goodtime Oldies 1170."
- 1190/1490: KRFT De Soto/St. Louis, MO flips from sports to classic country and talk, simulcasting with WFFX 1490 East St. Louis IL, which flips from sports/black gospel.
- 1230 WXNI Westerly, RI flips from NPR news/talk (simulcast with WRNI 1290 Providence RI/WRNI-FM 102.7 Narragansett Pier RI) to talk/soft AC with new calls WBLQ.

That just about clears my "In Tray" for another month so I'll sign off with best wishes for some good DX all around The Circle. Andrew

Colombia

<u>950.2</u>	HJUI	Armonías Boyacenses, QTH is Tunja. Owner: Simón Ortiz Medina	
<u>1080</u>	HJFF	R. Eco, Cali, ex R. Popular	Henrik Klemetz, ARC
<u>1140</u>	HJDL	Radio Paisa, “la Cariñosa de Medellín” has moved to Edificio Coltejer in downtown Medellín. Online I found the name of the station manager. I passed the info on to Arnstein Bue, of Norway, who received a swift reply. It is believed that all RCN outlets in Medellín are operating from this skyscraper, which is kind of a “landmark” in Medellín.	
<u>1300</u>	HJRB	According to online info, the name of the Tunja station is CRB, Cadena Radial Boyacense.	
<u>1390</u>	HJZY	Per online info, the name of the Bucaramanga station is La Primera.	
<u>1580</u>	HJQT	is now relaying “Candela” which is a popular FM outlet. The owner, William Vinasco Ch., has been leasing the channel to Radio Mar and then to Sonríele a Jesús Radio, but they have now left the frequency. The latter organization is instead heard at various times of the day and night on <u>1400</u> Emisora Mariana and <u>1430</u> AM 14-30 (ex-Emisora Kennedy). Vinasco also owns <u>1160</u> Ecos de Colombia, which has been leased to IPDA, Iglesia Pentecostal Dios es Amor. They offer independent programming but also, on occasions, relays from Radio Victoria, in Lima, Peru, and Radio Universo, São Bernardo do Campo, SP, in Brazil. (Yes, in Portuguese!).	

Ecuador

<u>1190</u>	HCDE2	UCSG Radio-Televisión – Universidad Católica Santiago de Guayaquil, Guayaquil, correct name	
<u>1530</u>	HCMZ6	R. Dorado Deportes, correct name. QTH: Pelileo	Henrik Klemetz, ARC

Peru

<u>600</u>	OBZ4W	R. Cora, Lima reactivated from mid October	Alfredo Benjamin Cañote Bueno via ConDig
<u>700</u>	OBZ4H	R. 700, Lima – inactive	Alfredo Benjamin Cañote Bueno via ConDig
<u>780</u>		R. Miraflores has abandoned this frequency	Alfredo Benjamin Cañote Bueno via ConDig
<u>1040</u>	OBX4O	R. Metropolitana, Lima – ex. R. OBX4O (LI21) – web: www.metropolitanaradioperuana.com	Alfredo Benjamin Cañote Bueno via ConDig
<u>1200</u>		Cadena Radio 1200 – ex Radio Cadena. Address: Avda. Colonial 1467, Piso 2 Interior 201, El Cercado, Lima. Heard by Kontro, identified by Klemetz and address info by Cañote	
<u>1220</u>	OAX6X	R. Melodía is still R. Melodía (AQ24) – not R. Fé as noted earlier (MVE 50/14) (Henrik Klemetz points out that contrary to our previous information Radio Melodía is still active on 1220.)	ed
<u>1320</u>	OAX4I	R. La Crónica, Lima // 850 R. Nacional	Alfredo Benjamin Cañote Bueno via ConDig
<u>1510</u>	OCX6O	R. Las Vegas, Arequipa (AQ40) – ex. R. Alegría. Slogan "te activa". New chain, present in several cities, nearly all transmitting on FM. Heard as unid by a.o. Jari Ruohimäki, Torolf Johnsson and Fredrik Dourén, identified by Henrik Klemetz	
<u>1570</u>	OAU7Z	R. Carráviz, Juliaca (PU32) – ex. 1560; Tarmo Kontro, Torolf Johnsson via Klemetz	

Venezuela *edited by Henrik Klemetz*

<u>740</u>	YVNC	CNB 7-4-0, "La Zuliana" seems to be the name of the station in Maracaibo according to online info and Max van Arnhem, who has been listening from Curaçao.	
<u>820</u>	YVXG	Radio Guadalupana is off the air says van Arnhem.	
<u>1020</u>	YVMX	The Maracaibo station is announcing Radio Calendario, not Radio Continente, van Arnhem reports in MWN. Also heard in Sweden on Dec. 25 by Fredrik Dourén.	
<u>1470</u>	YVJW	is no longer called Llanerísima according to van Arnhem and online info and actual listening but rather CNB 14-70, "La Valenciana". In the mid-80, this station was known as Radio Latina, and in their canned ID's they did not fail to mention their call letters, YVJW. With their new slogan, Latinísima and, later, Llanerísima the call sign is no longer heard. The omission of the station's call sign seems to be deliberate on many Venezuelans.	

WORLD NEWS

(Europe, Asia, Africa)
with Ton Timmerman

H. Heijermanspln 10, 2024 JJ Haarlem, The Netherlands
e-mail: world-news@mwcircle.org

Hello radiofriends,

In a snowy Haarlem I am editing this column. Inspecting of my antennas has been delayed by heavy snowfall last night and today. Some antennas do need a control check, but it is too slippery on my roof. For shortwave I will erect a second hand RF-systems Listeners Antenna (a mix of a longwire and a T2FD). This will be the first job when the snow is definitely gone.

Not too much news this time, but enjoy it.

Ascension Island

I received confirmation this evening from Russel Yon c/o the US Base on Ascension Island that Volcano Radio is not operating on medium wave at present. The station is broadcasting on 98.7 FM but there is uncertainty regarding future MW operation. 1602 and 1638kHz frequency has been deleted due to changes in contractual work and antenna usage. (Gary Deacon)

Austria

The complete antenna array of the Wien-Bisamberg MW site will be demolished at the end of February. So far it is not known what will happen with the grounds. The transmitter building is under preservation order. <http://wien.orf.at/stories/417899/> .

Transmissions from this site, on 1476 kHz, ceased on 31 Dec 2008 at 2310 UT. At this point it was planned to blow up only the 265 m tall "Nordmast" (northern mast), once used for the 585 kHz outlet that is silent for almost two decades now. The 120 m "Südmast" for 1476 kHz was supposed to be kept, and Österreichische Rundfunksender GmbH told ADXB-OE that the frequency would still be available for interested broadcasters. But now they dump this option definitely. Some photos of the antenna array: <http://www.wabweb.net/radio/sender/bisamberg2005.htm> .

More photos, also of the old tube transmitters, with a link to an even larger photo collection that includes also a shot of the Thomson M2W transmitter that had been used during the last years of operation: <http://radiomuseum.heim.at/index-Dateien/Page541.htm> .

This development makes the Moosbrunn site the only operational AM transmission facility in Austria. (AM in the German meaning, technically correct covering all amplitude-modulated broadcasting, also dubbed "LMK".) (Kai Ludwig via DXLD)

Belarus

I've been hearing presumed Belarus on 279 with a good signal past 2300, 0000 and 0100 for a few days now. There has also been another weaker signal under Belarus but too weak to hear even if the speech is by a man or a woman! This morning, January 6, at 0010 I heard a clear Belaruskaye

Radio ID. <http://www.emwg.info> shows 0400- 2200 so is this a permanent change or just an extension for Christmas / New Year? (Harry Brooks via DXLD)

Harry, according to recent reports in the Russian DX-circles, BR returned to its 24x7 operation on 279 kHz (perhaps from Jan.1). To me this news came as a surprise since I didn't realize that 279 wasn't on around the clock (since when I wonder?). (Sergei S. via DXLD)

<http://www.beaconworld.org.uk/files/LWBC.pdf> has Belarus as 0400-2300 in July 2005. I'm pretty certain they reduced 2300 back to 2200 either last year or the year before as well. I think that 279 is not as consistently as strong a signal as it was 3 or 4 years ago.(Harry Brooks via DXLD)

Germany

Hessischer Rundfunk 593 / 594 kHz. After the news and followed by announcement of night concert relay at 00.05:33 CET on Jan 1st, 2010 Hessische Rundfunk Frankfurt's mediumwave stations at Weiskirchen and Hoher Meissner switched off for ever. So a mixture of Bulgarian, Moroccan and Portuguese programmes remain on our ears here in southern Germany. Personally heard this program often in past 58 years.

History.

Radio Frankfurt started after WW II on Aug 23, 1947 at Heiligenstock site[by Reichspost in 1935y] via movable mediumwave "Martha" transmitter, which carried on 14 trucks and was one of numerous movable transmitter units by former "Reichspost" and used by special technical forces from places all over Europe, like Soldatensender Belgrade, in Sowjetunion, Netherlands, Norway and Karelia Finland. Four towers at 121 m height. Was screened towards 16 and 121 degrees at Sundvall-SWE and Pleven-BUL. Replaced on Oct 16, 1967 to new Weiskirchen site. Maximal 950 kW ERP, screened towards Sundvall-SWE and Sofia-BUL at 50°03'21.82"N 08°51'45.42"E

To cover Northern Hessen due to the screening towards Sweden, Hessischer Rundfunk erected a smaller relay station at Hoher Meissner (Hausen Lichtenau) on June 1, 1952. Started with 20 kW, was increased later to 100 and then maximal 250 kW of power during cold war time. Two towers of 110 and 160 m height. Signals were also screened at 17 and 127 degra. This caused a heavy buzz on daytime, because exact synchronization between the two MW locations was not very sufficient these days in 1952, 1953 ...The station was also well heard up to 300 kilometers into communist GDR (Soviet Occupied Zone of Germany) area. (Wolfgang Bueschel via wwdxc BC-DX TopNews)

Netherlands

One of the longest-serving commercial radio stations in the Netherlands, Radio 10 Gold, has a new owner - media conglomerate RTL Nederland. RTL's CEO, Bert Habets, explained that Radio 10 Gold, with its oldies format, complements its other stations which cater for different listener groups. The station has broadcast without interruption since 1988 and is currently heard only on cable and satellite. Dutch media mogul John de Mol, whose company Talpa have owned Radio 10 Gold since 2003, says he is happy about the sale because RTL will give the station the attention it deserves. Mr De Mol also said that as he is also a shareholder in RTL Nederland, he doesn't have to say goodbye to the

Voice Of England
"1395 AM"

**Powerful
50,000 Watt
Clear Channel
AM Station!**

We invite you to become one of our flagship ministries broadcasting on the Voice Of England - our newest Outreach partner and most powerful AM station reaching the United Kingdom! Not only will your broadcast reach a potential audience of over 80 million in the United Kingdom... you will also minister to a potential audience of over 500 million throughout all of Europe.

As quoted by the station manager, "Our night-time signal is reaching the United Kingdom, Ireland, France, Spain, Portugal, Italy, Switzerland, Austria, Germany, Luxembourg, Holland, Belgium, Denmark, Sweden, Norway, Finland, Poland and more... And remember English is the predominant secondary language for many Europeans."

Broadcasting with a 50,000 watt clear channel signal Voice Of England will beam your message on the AM frequency 1395 kHz, providing you with an effective radiated power of 100,000 watts! Not only will your listeners hear you in their homes, in their automobiles and in their offices, they will also have access to your ministry via the station's live Internet web stream.

SPECIAL OFFER for the first 20 ministries making their reservations
\$ 79 per 15 minute broadcast
\$139 per 30 minute broadcast

When compared to other AM stations with similar power, where the rates can range between \$400 and \$900 per 30 minute broadcast, you are realizing a savings of at least 52%!

Please call us at 905-726-2620 or 925-482-5800 in order to be one of the first 20 ministries to receive the special introductory rates! This offer expires January 25, 2010 so please call us right away! We look forward to hearing from you.

station.

Nothing has been said so far about whether RTL intends to try getting the station back on terrestrial transmitters. In the 1990s the Dutch station enjoyed wide popularity in neighbouring countries owing to its broadcasts via a powerful mediumwave transmitter. (*RNW website*)

Until end of August 2007 Radio 10 Gold was on 1008 kHz. (*Ydun Ritz, mediumwave.info*)

Netherlands

Several sources are mentioning the possibility of Big L to become "Voice of England", a religious station. This is being promoted by an American airtime broker (see picture) who has some clients who broadcast "fire and brimstone" programmes in the USA, so possibly we will be seeing Brother Stair on 1395...? This explains the recent resumption of test broadcasts on 1395 kHz. For further info see: <http://www.digitalspy.co.uk/forums/showpost.php?p=37955598&postcount=1> (*Svenn Martinsen*)

Nigeria

594 MW, Radio Nigeria Kaduna, at 2242-2258 UT on Jan 08, Hausa, African music, IDs "...Hausa Radio Nigeria Kaduna" and Qur'an recitation.

917 MW, Radio Gotel Yola, at 2131-2205 UT on Jan 08, African music and vernacular ann, from 2200 UT on in English. Only audible during musical-breaks of Radio Slovenija on 918 kHz. (*Patrick Robic, DSWCI DXW Jan 20*)

Taiwan

Kouhu - Hukou Village. Here's a new Panoramio image of a net style LOG periodic at or near the RTI Kouhu site. I didn't know RTI utilised any log periodics SW antennas at any of it's sites?? Perhaps this antenna is used by a different organisation adjacent to the RTI site?? I'm really not sure - more investigation needed. <http://static.panoramio.com/photos/original/27688867.jpg> . Below is the link to the previously seen RTI MW antenna at Kouhu: <http://www.panoramio.com/photo/16781350> . (*Ian Baxter, SW TXsite*)

Local radio stations frozen out of digital switchover debate **13 January, 2010**

Local radio stations fear they are being frozen out of the digital radio switchover debate, with the future of more than 100 of them still uncertain, an MP has warned. Alistair Carmichael, the Liberal Democrat spokesman on Scotland and Northern Ireland, led a debate about the government's plans for the future of local radio in Westminster Hall in the House of Commons.

"There are a lot of radio providers who feel their voice hasn't been heard yet," he told MediaGuardian.co.uk. "There has to be some sort of mechanism for getting people round the table and letting them have their say. That's not to say that we can always give them what they want – the nature of government is that you have to make hard choices and you can't please everyone – but it's important for people to feel that their views are being heard."

Carmichael said there was "widespread concern" from small independent stations that the digital economy bill would leave them facing an uneven playing field.

"Over 100 local stations still do not have a clear digital migration path and are likely to be consigned to an uncertain future on the analogue spectrum once digital switchover has occurred. It is important the government addresses this matter before committing to analogue switch-off." (www.guardian.co.uk/media)

RSL & LPAM News

Details of the football club's broadcasting their home games are as follows:

Football Club	Station	February, 2010	March, 2010
Crystal Palace	Palace Radio 1278 kHz	9 Swansea 16 Reading 20 Coventry*	6 Sheff Utd 16 Leicester 27 Cardiff

Hull students set up radio station **15 January, 2010**

Students from Winifred Holtby School Technology College have won a £15,000 Youth Opportunity Fund grant from Government funds to launch a radio station in Bransholme in Hull. The team of six 14 and 15 year-olds, who are all studying for a higher creative and media diploma, came up with the idea after a radio workshop in class.

The teenagers aim to launch Bransholme radio in the springtime and plug into the 10,000 residents of the estate, interviewing local people, promoting community events and sharing information.

Anita Hoy, Winifred Holtby's Extended Learning Co-ordinator, said: "These young people are so enthusiastic and have given 100 per cent to the project. They produced a very convincing case and had to attend some thorough interviews in order to secure this funding."

“They can see the benefits it will bring to themselves, in terms of new and improved skills in a specialised communications field, in confidence levels and in their exams, and to the wider community of Bransholme and the surrounding area in Sutton Park and Kingswood.” It is not yet known whether the station will be on MW or VHF.

Many thanks to the following reporters:

- AB Andrew Brade, Holme-on-Spalding Moor, East Riding of Yorkshire. AOR AR 7030 plus and Perseus SDR, Wellbrook phased array 290°, 305m beverage at 220°. Recording on Sony MZ-NH1 minidisc + Total Recorder.
- DH David Hamilton, Sorn, Ayrshire. Perseus SDR & home made indoor flag antenna.
- FW Friedhelm Wittlieb, Lünen, Germany. Grundig Satellite 700 with martens fram-antenna.
- JF John Faulkner, Sutton-in-Ashfield, Notts. Perseus SDR & flag antenna.
- JW John Williams, Hemel Hempstead, Herts. AOR 7030, 40m long wire.
- mah Martin Hall, Clashmore, Sutherland. Perseus SDR, RPA-1 preamp, beverages: 513m at 233°, unterminated; 506m at 279°, terminated; 550m at 338°, terminated. TotalRecorder.
- MDe Maurits van Driessche, Zele, Belgium. Perseus SDR, several Super Kaz antennas + Marconi, MFJ-1026 (modified), DBX-1215 preamp +12 dB.
- MvA Max van Arnhem, Hoenderloo, The Netherlands. AOR7030+; KAZ 35, 70, 160, 250, 290, 340 degrees.
- PC Paul Crankshaw; Troon, Ayrshire. Perseus SDR, EWE, , RPA-1 pre-amp, MFJ-1025 Phaser(modified).
- PCh Peter Chalkley, Luton, Beds. AOR 7030 and 40ft low strung wire.
- Rha183 Ronald Hagensen, DX 183, Northjylland, Denmark. Lowe HF-150, Yaesu FRT-7700, antenna tuner & SEM QRM Eliminator. Beverages at 300°, 315°, 330°, and 360°.
- SW Steve Whitt, High Catton near York. AOR7030+ and HF225 Europa with dual loop K9AY.
- TB/JF Tim Bucknall & John Faulkner, Matlock Forest. Perseus SDR + 300m Beverage at 30°.

VC Valter Comuzzi, Pasion di Prato, Italy; unattended Perseus recording in Piancada. Beverage 550m at 307° terminated.

WH183 Wilhelm Herbst, DX 183, Northjylland, Denmark. Lowe HF-150, Yaesu FRT-7700, antenna tuner & SEM QRM Eliminator. Beverages in following directions 300°, 315°, 330°, and 360°.

Sadly, no logs from **Barry** this month – he writes: “Laptop still not repaired so no logs .. They have until the 6th of Feb or they give me a new one with an equivalent or better spec. I am thinking I will be using Windows 7 after all hi!”

I’ve paraphrased **Ronald’s** description of his holiday trip to Wilhelm Herbst’s antenna farm "DX 183" in Northjylland, Denmark: “It’s fun for the hobby and for the body and soul! Early each day I walked 3 kilometres in this wonderful winter landscape - wide open nature, and no electricity masts or other disturbances for 10 kilometres! A holiday trip to his antenna farm is good at all seasons of the year.”

Max writes: “In the January issue of MWN you had a question about the ID of my 1470 kHz logging (page 53). In the past YVJW identified as "Llanerisima 14-70". While I was on holidays on Curaçao, Netherlands Antilles I heard the station ID-ing as "CNB 14-70, La Valenciana". Also during my reception on December 23rd here in The Netherlands , I heard this ID. The last time I heard the Llanerisima ID was on September 17th, 2009”. *Many thanks for keeping us updated, Max, and for the very clear recording of the ID you sent me – mah.* In a separate e-mail, he tells us: “Until about the 1st of January I had nice signals towards the States and Canada. In January conditions were very moderate; only towards Asia some days gave nice conditions with reception from Japan. I monitored 594 and found FRCN Kaduna s/off at 2300 with the NA. Several times I received Syria with s/off at 1600UTC with the NA”. Regarding his log last month, **Rein** confirms that “WAXY was indeed received on 790 kHz. 920 was a typo.”

Maurits comments: “Conditions are not so good, but from time to time proper peaks (in the) LA direction”. **Valter** adds: “Just a handful of new stations caught in the recordings of the same DX night I sent you last month. Most welcome is KTIQ. California is a new state for Piancada and a dream come true!”

Paul C: “Conditions seemed to slump quite considerably around the middle of the month and have taken some time to recover - the last 3 mornings covered by the log have thrown up some interesting shorter skip DX - with the area around New York appearing to be particularly favoured. I missed out on some of the period, being away during quite a bit of the holidays”.

John F: “I haven’t really been participating in MW DX this month, having been away from home a lot of the time. I heard very little on the few occasions when I felt conditions were interesting enough to record. I conclude that the Midlands had its own Midwinter Anomaly since the chaps north of here were doing much better. However, it is encouraging to find conditions have picked up a little since the deadline so hopefully some better loggings next time. Good DX to all!”

Steve: Again, to keep the list manageable, I have omitted the everyday signals, and I still have not heard CJYQ this season! At end of January I was still getting trans-Atlantic DX well after 2hours post sunrise (mainly 1010, 1050, 1520 and 1540kHz).

Here in **Clashmore** the early part of January brought many low power stations from the western Great Lakes area during the late morning (around 1100 UTC, and all on the 279 degree beverage). None of the new catches were particularly strong, and required careful checking of the recordings.

The **deadline** for the March 2010 DX Loggings is **Tuesday 23rd February**. I look forward to receiving your logs by then, preferably electronically/via e-mail using the Word pro-forma, which I can supply on request if you don’t already have one; **very many thanks** to all members making the effort to submit contributions following the format used in DX Loggings.

73, Martin
